

Quintessa Medical Spa

"Where most spas merely state they provide "results." At Quintessa Medical Spa, we truly do and our clients love what they see and feel!" — Dr. Andrew Campbell, M.D.

Dr. Andrew Campbell is a double board certified facial plastic surgeon and the medical director of Quintessa Medical Spa in Sheboygan. Their team of medical skin care professionals can help you permanently get rid of the unwanted hair and veins on your legs. Utilizing multiple lasers, Quintessa can treat a wide spectrum of hair and skin types while patients relax in elegant, tranquil, private surroundings. Results are instant, long lasting, and enable you to look beautiful and to feel healthy.

Men and women of all ages choose to have laser hair removal performed by the experienced team at Quintessa Medical Spa because it is quick, easy, safe and effective. Quintessa offers long lasting, permanent results unlike other services or treatments (i.e. hair removal creams, shaving, waxing, or painful electrolysis needles) that are temporary and each treatment is overseen by Dr. Campbell.

During laser hair removal at Quintessa Medical Spa, a skilled technician glides the hand piece of the laser along the skin to deliver pulses of light/laser energy to the hair follicles. This heats the hair follicles reducing or eliminating their ability to produce hair. The state-of-the-art lasers used by the professionals at Quintessa Medical Spa allows them to perform treatments quickly and with great precision. This system allows them to treat thousands of hair follicles at one time; however, it may take three to five treatments depending on the growth cycle of your hair and the hair density of the areas you have treated to achieve the

desired results.

The technicians at Quintessa Medical Spa can also remove spider veins and small varicose veins with laser technology. This treatment is done in much the same manner as with laser hair removal, but instead of targeting the hair follicles, the laser is used to destroy unwanted blood vessels. It works by heating the inside of the vein, which causes it to seal shut and disappear. Once the treatment is complete, the result is permanent; but for optimal results a few treatments may be required depending on the size and type of the vein to be removed.

Quintessa Medical Spa wants to help keep your skin in the best possible condition. For this reason, each patient undergoes a one-on-one skin care analysis to determine the best treatment plan and skin care plan to attain and maintain healthier skin. A full array of medical skin care treatments and products are available to help clients achieve real results. Some of the treatments may include: customized Botox treatments, wrinkle fillers, Clarity Pro Skin Analysis, microdermabrasion, IPL (Intense Pulse Light) therapy for pigment removal, laser treatments for wrinkles, and permanent make up. Additionally, Quintessa utilizes only medical grade skin care products like Obagi, Jan Marini, IS Clinical, and make up by Colorescience to help patients develop healthier skin and maintain their new look.

The staff of Quintessa Medical Spa wants you to achieve your skincare goals to look better and feel more confident. Visit www.quintessamedicalspa.com for SPECIAL OFFERS, or call 920-458-QSPA (7772) for a FREE Consultation.
